Kincaid Plant Markers
Made in USA

How to Assemble P, A & F Markers

Stainless label-holder Markers · Same steps for P, A and F styles

1 Line them up.
Plate flanges up (slot on one edge, two round holes on the other). Post: bent loop up.

2 Push the legs through.
Insert both leg ends into the two round holes in the plate.

3 Hook the loop.
Slide the plate up to the bent loop at the top. Tilt the plate and hook the loop into the long slot.

4 Done.
Your Marker is garden ready. The plate sits at the top, angled so the name is easy to read.

How to Assemble M, L & E Markers

Stainless label-holder Markers · Same steps for M, L and E styles

1 Line them up.
Plate flanges up (two round holes on one edge, long slot on the other). Post: bent loop up.

2 Push the legs through.
Insert both leg ends into the two round holes in the plate.

3 Hook the loop.
Slide the plate past the bend and the closed loop, then reverse and thread the loop through the long slot.

4 Done.
Your Marker is garden ready. The plate sits at the top, angled so the name is easy to read.

Tip Once the loop is through the slot, the plate cannot fall off. Reverse these steps to remove it.
